OFFICE MEMORANDUM

Subject – Clarification regarding non-requirement of Booster Dose of Yellow Fever Vaccine (YFV) for passengers travelling from/to Non-endemic countries - regarding.

In continuation of the letter no. L-21021/52/2013-PH (IH) dated 30.08.2017, sent to WRI, WHO on the same subject, wherein it was agreed upon by India that a single dose of YFV provides lifelong immunity and no booster dose is required after 10 yrs, it is further clarified that:

- a) The certificate of vaccination against yellow fever is valid for the life of the person vaccinated.
- b) This lifetime validity applies automatically to all existing and new certificates, beginning 10 days after the date of vaccination.
- c) Accordingly, revaccination or a booster dose of yellow fever vaccine will not be required for international travelers. This amendment to the IHR was agreed upon by WHO in July 2016 and agreed by the Government of India in August 2017.
- d) Currently, valid IHR international certificates of vaccination are now automatically valid for life of the traveler indicated. Nothing needs to be modified in the certificate; indeed under the IHR, any changes, deletions, erasures or additions may cause a certificate to be rendered invalid.
- e) The validity of YFV certificates issued by other countries will also be treated as valid for the life of the person vaccinated.

A note of the above information may be taken for compliance by all stakeholders.

This issues with the approval of the Competent Authority.

Dr. Himanshu Chauhan,
DADG (IH).

To,

1. All APHOs/PHOs/LBQCs.
2. All YFVCs.
